

◆ Raul SARBU

Raccoony is a game browsing application.

Why?

- ◇ Interesting concept
- ◇ Learning opportunity
- ◇ Teamwork experience
- ◇ Git/Jira real applications
- ◇ Improve Java proficiency

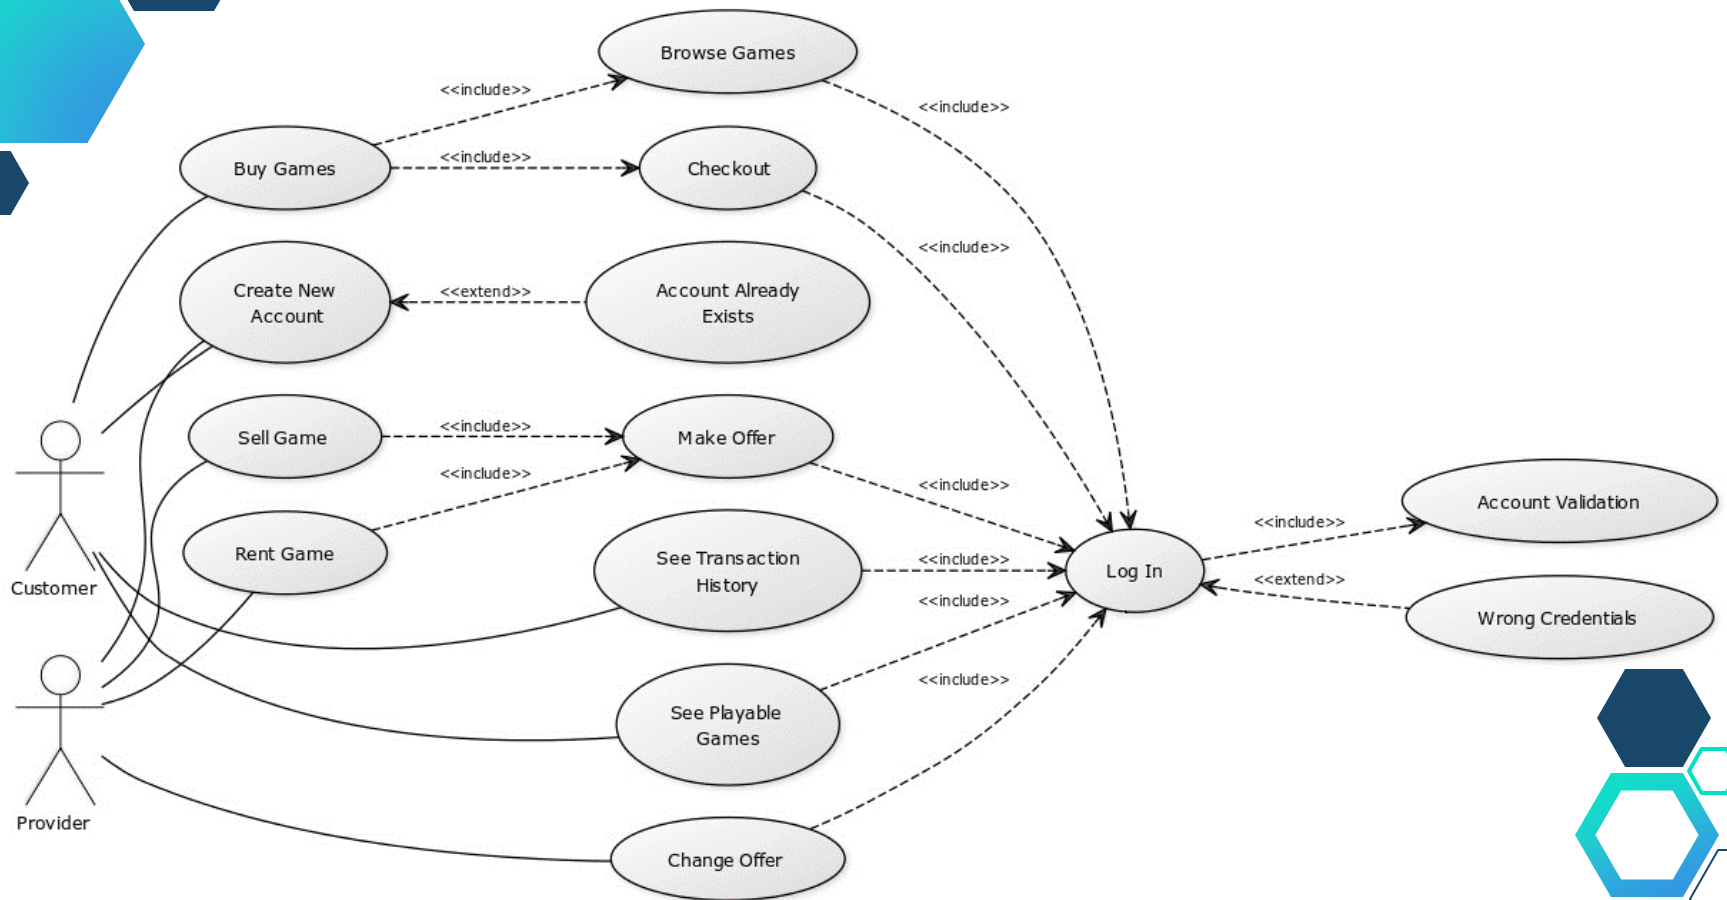

A decorative pattern of hexagons in various shades of blue and cyan. Some hexagons contain icons: a lightbulb, a thumbs up, a smartphone, a magnifying glass, and a gear. A network diagram with a central node and five peripheral nodes is also visible.

GitHub

Teamwork

Raccoony

Raccoony is a game browsing application, designed for a university project.

Project Idea

Users can register and login as `Customers` or `Providers`.

`Providers` are able to publish and sell their games, while choosing between the options of selling or renting their game.

Renting a game allows a `Customer` to own that game only for a specific time period.

`Customers` can add money to their virtual wallet and buy or rent the games that `Providers` offered.

Testing Overview

Component testing

Database testing

Controller testing done separately

```
@Test
void validUsername() {
    assertTrue(UserDTB.validUsername(user1));
    assertTrue(UserDTB.validUsername(new User( username: "Tony Cox", email: "", password: "")));
    assertFalse(UserDTB.validUsername(new User( username: "Bonk", email: "", password: "")));
}

@Test
void validEmail() {
    assertTrue(UserDTB.validEmail(user1));
    assertTrue(UserDTB.validEmail(new User( username: "", email: "caramida@de.cox", password: "")));
    assertFalse(UserDTB.validEmail(new User( username: "", email: "Alabama", password: "")));
}

@Test
void validPassword() {
    assertTrue(UserDTB.validPassword(user1));
    assertTrue(UserDTB.validPassword(new User( username: "", email: "", password: "Af69x")));
    assertFalse(UserDTB.validPassword(new User( username: "", email: "", password: "qerty")));
}

@Test
void existsUser() {
    assertFalse(UserDTB.existsUser(user2));
}
```

```
@Test
void validGameName() {
    assertTrue(ProviderDTB.validGameName(game1.getName()));
    assertFalse(ProviderDTB.validGameName(""));
}

@Test
void validDoubleValueInput() {
    assertTrue(ProviderDTB.validDoubleValueInput( price: "" + game1.getPrice()));
    assertTrue(ProviderDTB.validDoubleValueInput( price: "05"));
    assertFalse(ProviderDTB.validDoubleValueInput( price: "5676jhg"));
}

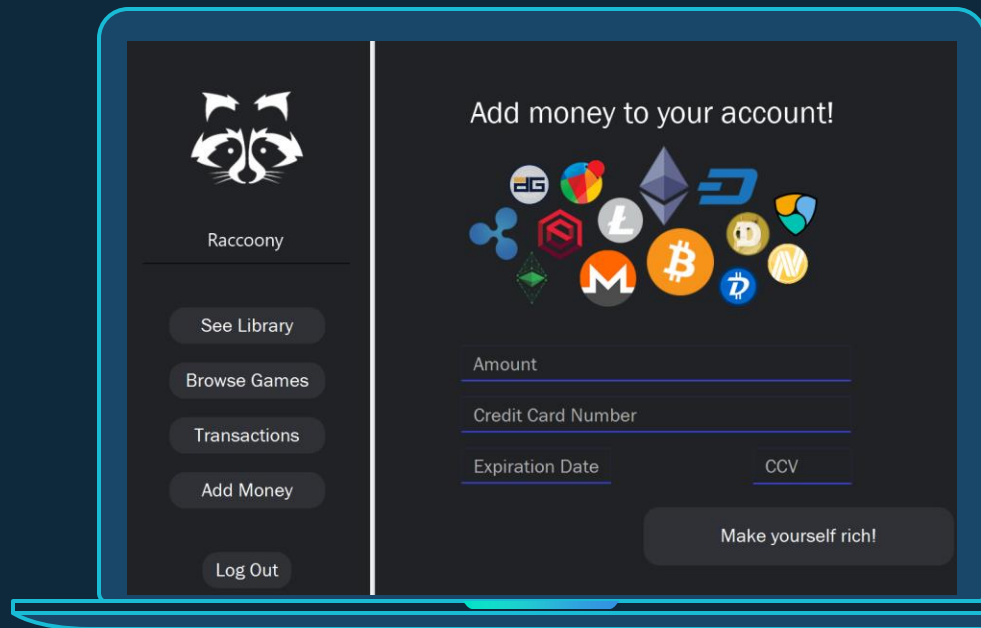

@Test
void validGameDates() {
    assertFalse(ProviderDTB.validGameDates(game1.getStartDate(), game1.getEndDate()));
}

@Test
void validDescription() {
    assertTrue(ProviderDTB.validDescription( game1.getDescription()));
    assertFalse(ProviderDTB.validDescription( "Too short" ));
    assertTrue(ProviderDTB.validDescription( "Just long enough" ));
}

@Test
void validCreditCard() {
    assertTrue(ProviderDTB.validCreditCard("1111-2222-3333-4444"));
    assertFalse(ProviderDTB.validCreditCard("11c1-2222-3333-4444"));
    assertFalse(ProviderDTB.validCreditCard("324"));
}

@Test
void validExpirationDate() {
    assertTrue(ProviderDTB.validExpirationDate( expDate: "11/23"));
    assertFalse(ProviderDTB.validExpirationDate( expDate: "23/54"));
    assertTrue(ProviderDTB.validExpirationDate( expDate: "09/25"));
}
```

Sneak peak

Thank you
for your
attention!

Any questions?
