SUBJECT

Calorie Tracker

OVERVIEW

- React.js – User Interface
- SQL Database
- API calls – hopefully (USDA Food Data/European Alternative)

…

DESCRIPTION

- Create an account to store all your data.
- A wide variety of foods that you can choose from, to add to your meal, allowing you to set the amount.
- Add:
  - Your own food (local supermarket, …).
  - Your own recipes, from already existing ingredients, given different measurements.
- Goals:
  - Set daily calorie goals.
  - Set weight goals, that calculate the calories needed to reach that goal in a given number of weeks/months.
- Weight tracker.
- I'll think of other things during development.
